

TMAS

Textile Machinery Association of Sweden

TMAS – with a focus on textile producing customers

A Swedish contribution to the global textile industry. TMAS companies have leading positions in various segments of the market for textile production equipment and technology. With a long, successful history of textile manufacturing in Sweden, the companies bring new technology to the global textile industry.

With a clear customer focus, TMAS companies offer expertise that facilitates processes and production flows. Their knowledge, products and services help to guarantee quality and long-term profitability both for the TMAS companies and their customers.

TMAS (Textile Machinery Association of Sweden) was founded in 1997 to help its member companies improve their export performance. In particular, TMAS:

- represents and supports member companies at major international exhibitions and events
- provides up-to-date information about market opportunities etc. and helps members benefit from them
- serves as a platform for sharing ideas and forming industry strategies
- represents the companies when meeting with national and international authorities and trade organisations

Swedish Quality

Acclaimed Swedish quality. World-renowned research and technology development. This is how TMAS companies have remained successful as changes in technology and the ever changing needs of the market have impacted the global textile industry.

Long-term Relationship

As global textile industry suppliers, we have a reputation for flexibility, accountability and building long-term customer relationships. Collaborating with one of our associated companies means that the main focus will always be on the customer!

Leading Position

The Swedish manufacturing industry's long history of success serves as a guarantee for favourable development in the companies employing services and buying products from our members. Every company belonging to our association has a leading position in its segment of the market for textile production equipment and technology.

Profitability

All of our members have in-depth knowledge of the textile business and operations. They offer valuable skills for streamlining and facilitating processes, manufacturing and production flows all aimed at increasing profitability and improving product quality.

Tradition

The Swedish textile industry has a long and successful history. For generations, our associated companies have fuelled technological development and innovative research that has made an impact and a major contribution to manufacturers worldwide.

International

Since almost all sales by TMAS companies are made outside Sweden, we have a wide international network and extensive knowledge of different market demands. Our member companies have highly developed specialisations in various niches and sharing innovative abilities and ideas across the network contributes toward customer success.

CEMATEX

TMAS is a member of CEMATEX (The European Committee of Textile Machinery Manufacturers). Members of CEMATEX are the textile machinery association of Belgium, France, Germany, Italy, The Netherlands, Spain, Sweden, Switzerland and the United Kingdom.

Membership in CEMATEX offers a variety of benefits. It facilitates networking and cooperation. It provides an opportunity for taking the lead in creating a “World Forum of Textile Technology” and for assuring the price and quality of key industrial trade shows. It also ensures a clear dialogue and open communication with the EU and other official bodies.

CEMATEX is the owner of ITMA, the world’s largest international textile machinery exhibition.

ACG Nyström AB
 Box 929 • SE-501 10 Borås
 +46 33-17 88 00
 info@acg.nystrom.se • www.acgnystrom.se

ACG Nyström offers solutions within cutting, sewing, embroidery, garment printing and product life management for textile products on the Nordic, Baltic and Ukrainian market. The product range extends from the simplest needle to large complex machines for industry. The company often has a unique role as the link between the world's leading equipment manufacturers and customers in the important development process. ACG Nyström was founded in 1921.

Eltex of Sweden AB
 Box 24 • SE-283 21 Osby
 +46 479-53 63 00
 info@eltex.se • www.eltex.se

Eltex is a leading company in weft and yarn supervision. The core activity is to develop yarn break sensors and tension monitors together with OEM customers. Close cooperation between Eltex and the machine makers is essential for the business. This is the basis for the market leading position the company has today.

Knowledge of yarn break detection and tension monitoring, combined with the machine makers know-how ensures that the sensors have the highest performance and quality.

ES Automatemex Solution AB
 Hagenvägen 3 • SE-513 50 Sparsör
 +46 33-22 60 50
 info@esautomatemex.com • www.esautomatemex.com

ES Automatemex Solution AB specialises in automated machines for the home textile industry. We promote new machines from our partner Automatemex Inc. in Canada for this industry segment. Today, we can offer solutions from full-scale production to small specialised production. We also trade with refurbished automatic sewing machines from AKAB of Sweden AB. This offers full flexibility regarding customer requests and requirements, tailored to their investment budget.

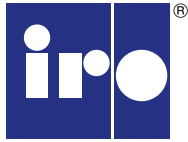

Eton Systems AB
 Box 15001 • SE-507 15 Gånghester
 +46 33-23 12 00
 mail@etonsystems.com • www.etonsystems.com

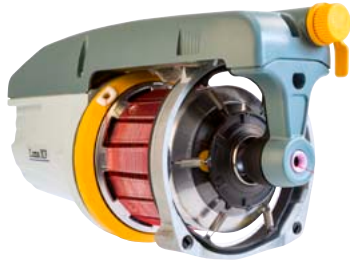

Eton Systems globally provides material handling systems consisting of individually addressable product carriers, automatically finding its way to the correct operation. The systems are designed to eliminate manual transportation and minimize handling, radically increasing the time for adding value to customer's products.

Eton Systems is the innovator and world's leading supplier of the Unit Production System (UPS), a productivity and management system developed specifically for use in the apparel, home textile and light product industries.

IRO AB
 Box 54 • SE-523 22 Ulricehamn
 +46 321-297 00
 info@iro.se • www.iroab.com

IRO is the market leader in the development and production of yarn feeding equipment, manufacturing and supplying a comprehensive range of yarn feeders and accessories for the textile industry. IRO products are developed with the most advanced technologies and resources, which coupled with unrivalled expertise and experience ensures the production of high quality products at a competitive price.

IRO feeders utilise the latest high-tech “Permanent Magnet Motor” technology, which IRO offers as a unique, customised solution for applications also outside of the textile industry, competitively priced even in small quantities.

Kinna Automatic AB
 Specialist in textile machines
 Part of the ACG Group AB

Kinna Automatic AB
 Masking. 10 • SE-511 62 Skene
 +46 320-20 54 80
 info@kinnaautomatic.se • www.kinnaautomatic.se
